Double-digit organic growth in Q1-22 driven by increasing volumes ...

In Q1-22, Labomar showed double-digit organic growth (i.e. +10.5%) coupled with the full consolidation of the companies acquired in 2021 (+34.4% overall). The increase was driven by the recovery of sales related to cough & cold and probiotic segments, strongly impacted by the pandemic in Q1-21, coupled with increasing revenues stemming from the main key international customers. ImportFab grew by 6.5% YoY despite persistent difficulties in raw materials procurement. The group is proving to be able to suitably face some supply chain related difficulties, such as the shortage of certain raw materials (mainly primary and secondary packaging, such as paper, plastic, and aluminium, as well as a few active principles and excipients) and the absence of employees due to testing positive for Covid-19. Furthermore, the prudent stock of raw materials carried out in the last part of 2021 in order to prevent shortages is allowing Labomar to safeguard margins to a certain extent.

... however, difficulties in raw materials procurement persist

In the first part of 2022, the global economic environment remains tough, as difficulties in the procurement of some raw materials persist, both in terms of lengthening delivery times and increasing costs. Moreover, the Covid-19 pandemic is still causing some operational problems, such as the absence of employees due to testing positive or the reduction in medical representatives' visits to prescribers and pharmacists.

Labomar implemented a few measures to properly manage the current tough scenario

Labomar plans to face the current harsh environment by 1) strengthening the group's procurement organisation and looking for new alternative suppliers, 2) incentivising workers in order to lower absenteeism and making more use of temporary workers and 3) avoiding doing business with Russian and Ukrainian customers and suppliers. The group stated it is confident about reaching double-digit growth in 2022.

A leading one-stop-shop CDMO, unquestionably a reference partner for its customers

Thanks to the M&A activity carried out since the IPO, Labomar has strengthened its full coverage of the entire value chain, unquestionably becoming a fully integrated player offering their customers services across the entire product life-cycle, from R&D activity to packaging of finished products. In addition, the group is able to manage the plants cultivation through Labomar Next as well as the manufacturing of botanical extracts thanks to Labiotre. We believe Labomar is unquestionably a value player in the medium/long term on the back of its 1) strong R&D effort, supported by continuous investments, 2) wide ready-to-market product portfolio, 3) ability to manage several delivery forms, 4) full coverage of the entire value chain, and 5) proactive go-to-market strategy. Estimates, rating and PT confirmed.

The Company at a Glance

Originating in 1998 from a family pharmacy owned by Mr Bertin, today Labomar is a research-driven full-service B2B Contract Development and Manufacturing Organisation (CDMO). It operates in the dietary supplements and medical devices market and provides global big pharma companies with dietary supplements and medical devices featuring high value-added technological content. Labomar aims to be the reference partner for customers looking for innovative and effective products, able to improve people's wellness. Labomar as a stand-alone reported an 11.5% organic sales CAGR₁₄₋₂₁ mainly as a result of continuous product innovation and the consequent increased share of wallet with pharma corporations. Including M&A, top line showed a 16.7% CAGR_{14-21PF} in the same period, resulting in a wider product portfolio and access to new countries.

In 2021, total revenues were € 64.5m (39% of which generated abroad), adjusted EBITDA totalled € 10.1m, 15.2% margin and adjusted Net Profit was equal to € 8.4m (12.6% margin). Net Financial Position was € 28.2m. On a pro-forma basis, FY-21 revenues totalled € 74.2m and EBITDA reached € 12.7m, 17.1% margin.

RATING SYSTEM

- a **BUY** rating is assigned if the target price is at least 15% higher than the market price;
- a **SELL** rating is assigned if the target price is at least 15% lower than the market price;
- a **NEUTRAL** rating is assigned if the difference between the current price and target price lies within the +/-15% range identified using the preceding criteria.

The rating is determined on the basis of the **expected absolute return over a 12-month period** and not on the basis of the estimated outperformance or underperformance relative to a market index. Thus, the rating can be directly linked to the estimated percentage difference between current and target prices. The prices of the financial securities mentioned in the report (also used for the calculation of market capitalisation and market multiples) are the reference prices of the stock market trading day preceding the publication date of the report, otherwise stated.
